HEALTHCARE FOR THE MANY LIVES YOU LIVE

Scottsdale Center for
Women's Health

LVRI of Scottsdale

DR. BURT WEBB, M.D., FACOG
DR. RUSSELL BARTELS, M.D., FACOG

Scottsdale Center *for Women's Health* excels in providing outstanding specialty care to our patients. Our proven experience is equally matched by our commitment to mastering the most advanced gynecological options available. Our singular goal is to empower your wellbeing with choices that include common practices as well as the latest in elite alternatives.

Specialties:

OBSTETRICS When having a baby, we provide you with safety as well as choice. If you have experienced miscarriages or complicated pregnancies, or are over age 34, we excel in helping you take measures to achieve a healthy delivery. Whether you wish a natural delivery, epidural, or c-section, we are happy to accommodate your requests. We also offer on-site ultrasounds with 3D/4D imaging and free pregnancy testing.

HORMONE THERAPY We offer pellet implant hormone therapy as well as natural hormone therapy for menopausal women.

URINARY STRESS INCONTINENCE We offer a minimally invasive, 20 minute outpatient procedure using a Gynecare TVT Sling to treat sudden urine loss.

PERMANENT BIRTH CONTROL While we offer tubal ligation, we recommend the much less invasive Essure method. Essure involves inserting mesh-like springs into the fallopian tubes that block the flow of eggs. This procedure is completed in less than one hour, in our office, without general anesthetic.

HEAVY PERIODS If you suffer from heavy or long periods, Thermachoice Ablation is a safe, effective, in office procedure that may be your answer to decreasing the intensity and frequency of your periods, or even stop them all together. This procedure is completed in less than one hour, in our office, without general anesthetic.

AMONG OUR GYNECOLOGICAL SERVICES

- ~ Treatment for infertility
- ~ Solutions for decreased libido
- ~ Healthy transition to menopause
- ~ Treatment for leaky bladders
- ~ PMS and painful periods
- ~ Ultrasounds and 3D/4D imaging
- ~ Treatment for pelvic pain

- ~ Discreet testing and treatment for sexually transmitted diseases

“As a husband and a father, I know how important a healthy wife and mother is to the entire family’s wellbeing. It’s my privilege to help women stay healthy and live vibrantly through every stage of life.”

DR. BURT WEBB
OB/GYN & GYN COSMETIC SURGEON
Having practiced in Scottsdale for more than 23 years, Dr. Webb is respected among physicians for his exceptional care and innovative surgical skills, and frequently has been named a top doctor by his peers. In addition, Dr. Webb’s Beverly Hills training in laser cosmetic procedures provides patients with choices for achieving their best possible health. He frequently speaks and teaches nationally concerning women’s health.

“Keeping up with the latest health information can be a challenge for today’s busy woman. I give patients access to the most up to date information so they can make the best decisions for their health.”

DR. RUSSELL BARTELS
OB/GYN & GYN COSMETIC SURGEON
Dr. Bartels received his training at Providence Hospital in Michigan. As chief resident, he was respected for his leadership and award-winning minimally invasive laparoscopic surgeries. With a passion for cosmetic vaginal laser procedures, Dr. Bartels continued his training in Beverly Hills, Calif. and today uses the latest surgical techniques to give women the highest possible quality of life and a fast recovery.

NURSE PRACTITIONERS

Katherine Pratt
RNC, WHNP

Janis Rustad
RN, MN, FNP-C

The Laser Vaginal Rejuvenation Institute *of Scottsdale* specializes in vaginal cosmetic surgery to help you feel and look your best. You no longer have to accept vaginal looseness or a loss of sexual satisfaction as part of aging or childbirth. Laser Vaginal Rejuvenation (LVR) is often combined with Designer Laser Vaginoplasty (DLV) to restore and enhance the aesthetic appearance of the labia and other structures. Because lasers are used, there is minimal blood loss, patient recovery time is quicker and there is no chance of scarring or change in sensation as there might be with traditional scalpel surgery.

LASER VAGINAL REJUVENATION This one hour, outpatient procedure tightens the vagina by removing excess vaginal lining and strengthening the surrounding tissues and muscles. During childbirth, these tissues and muscles become stretched. Many women complain of decreased sensation and less sexual satisfaction during intercourse, even after the vagina has returned to a “normal” size. Laser Vaginal Rejuvenation surgery yields a vaginal tightness similar to before the patient had children.

DESIGNER LASER VAGINOPLASTY These complementary cosmetic procedures enhance the appearance of the vagina. The most common is the Laser Reduction Labiaplasty to change the size or shape of the labia minora or majora. Other procedures include:

- ~ Laser Perineoplasty to restore an aging or damaged perineum muscle through the removal of bulky skin around the outside of the perineum.
- ~ Laser Hymenoplasty to reconstruct the hymen for cultural or personal reasons.
- ~ Laser Reduction of Prepuce to improve sensitivity of the clitoris by removing the excess skin around it. The clitoris itself is not touched.

G-SPOT AMPLIFICATION This simple and safe 15-minute in office procedure enlarges and elevates the bundle of vaginal nerves known as the “G-spot” to boost sensual sensitivity. For 87% of the women treated, this improved sensitivity results in quicker and easier sexual arousal as well as more intense and more frequent orgasms.

For a complimentary consultation with one of our board-certified gynecologists call 480-945-LVRI (5874). For more information please visit www.scottsdalelври.com
